

You are invited to participate in a study entitled:

A Person-Centered Medication Teaching among People with Limited-English-Proficiency

Purpose

The purpose of this project is to study whether a medication teaching program helps people understand their medications and to assist them with taking their medications as prescribed.

Qualifications

You qualify to participate if you are able to:

- (1) read Spanish;
- (2) speak Spanish as the primary language;
- (3) join virtual video-conferencing;
- (4) take at least 3 prescription medications;
- (5) not be a healthcare professional;
- (6) have one or more chronic diseases.

If you choose to participate, you will be asked to

- (1) complete an online survey to share knowledge on your medicines;
- (2) take part in virtual meetings with a nurse to learn your medicines and a list of 5 new medicines;
- (3) complete a post-education survey online;
- (4) complete a follow-up survey one-month after your education session online.

Visit shorturl.at/ADQ13 to participate in this study. Upon completion of the pre-education survey, education, and post-education survey, you will receive a \$15-dollar Amazon gift certificate for your participation in this study. You will receive an additional \$10-dollar Amazon gift certificate upon completion of the follow-up survey.

Time required: 45-60 minutes.
